ORGANIC

ABOUT COMPANY

Master Food LLC is a private company founded in 2007. The basic business activity of the company is purchasing and processing soft fruit, primarily raspberry of Willamette sort, blackberry, blueberry, strawberry, and current. Our cold storage and processing plant possess the most modern cooling capacity with a daily freezing capacity of 50 tons, an annual processing capacity of around 3000 tons with the same retail packing capacity in pillow bags and stand-up pouch (Doypack).

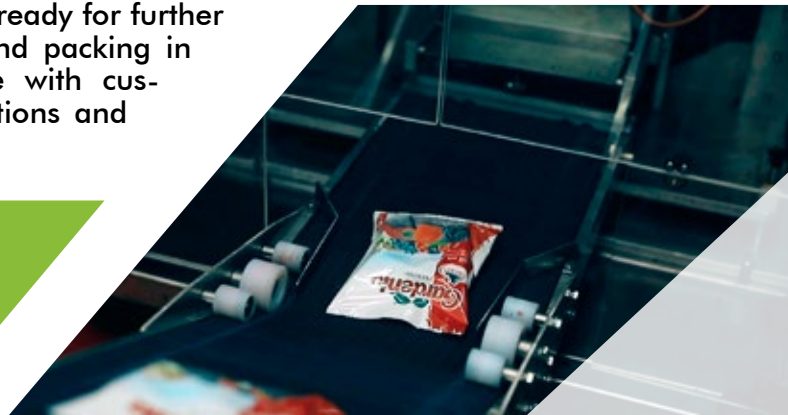

Cold storage, and the representative office of the company, are located in Užice, at 7 Jelovogorska street. Our agronomists are always available to advise the producers we work with, to expertly guide them in the best possible fruit production technology. We are convinced we can verify that we have complete control over our production with this way of working.

Technological procedure of fruit processing

Hand-picked fruit is delivered to cooling storage on vehicles that are fully compliant with required food quality and food safety standards. Freshly delivered fruit undergoes initial quantity and quality control and is packed in pallet boxes. Next, fruit goes through a primary cooling process while being exposed to temperatures from 0 C to 2 C. Chilled fruit then goes to stationary tunnels where the process of freezing takes place by exposing the fruit to temperatures of down to -30 C. Frozen fruit is then packed in boxes and on pallets and stored in drive-in chambers at the temperature of -20 C. Produce is then ready for further processing and packing in correspondence with customer's specifications and instructions.

IQF PRODUCTS

Raspberry

- IQF Raspberry – varieties Willamette, Meeker
- Rolend – whole fruit (95%-5%),
- Whole and broken (50%-50% to 90%-10%)

Product quality and safety

From the very beginning, the company is aimed to fulfill and implement high standards and criteria in the food industry. Therefore, the company complies with HACCP, BRC Food, USDA ORGANIC, and EOS. We use a system of traceability, which means that we track all info about the quality and safety of our products, from the agricultural producer to the final product.
